

# Take Control of Every Case

*From Collection to Review*

VENIO

# The Challenge eDiscovery Managers Face

Managing discovery projects across multiple tools creates inefficiencies:

- 👉 *Juggling collection, processing, and review workflows*
- 👉 *Risk of errors, delays, and cost overruns*
- 👉 *Difficulty tracking project progress across teams*

These challenges don't just slow down discovery, they can increase costs and risk if not addressed efficiently. That's why legal teams need a solution that unifies workflows and keeps projects on track.

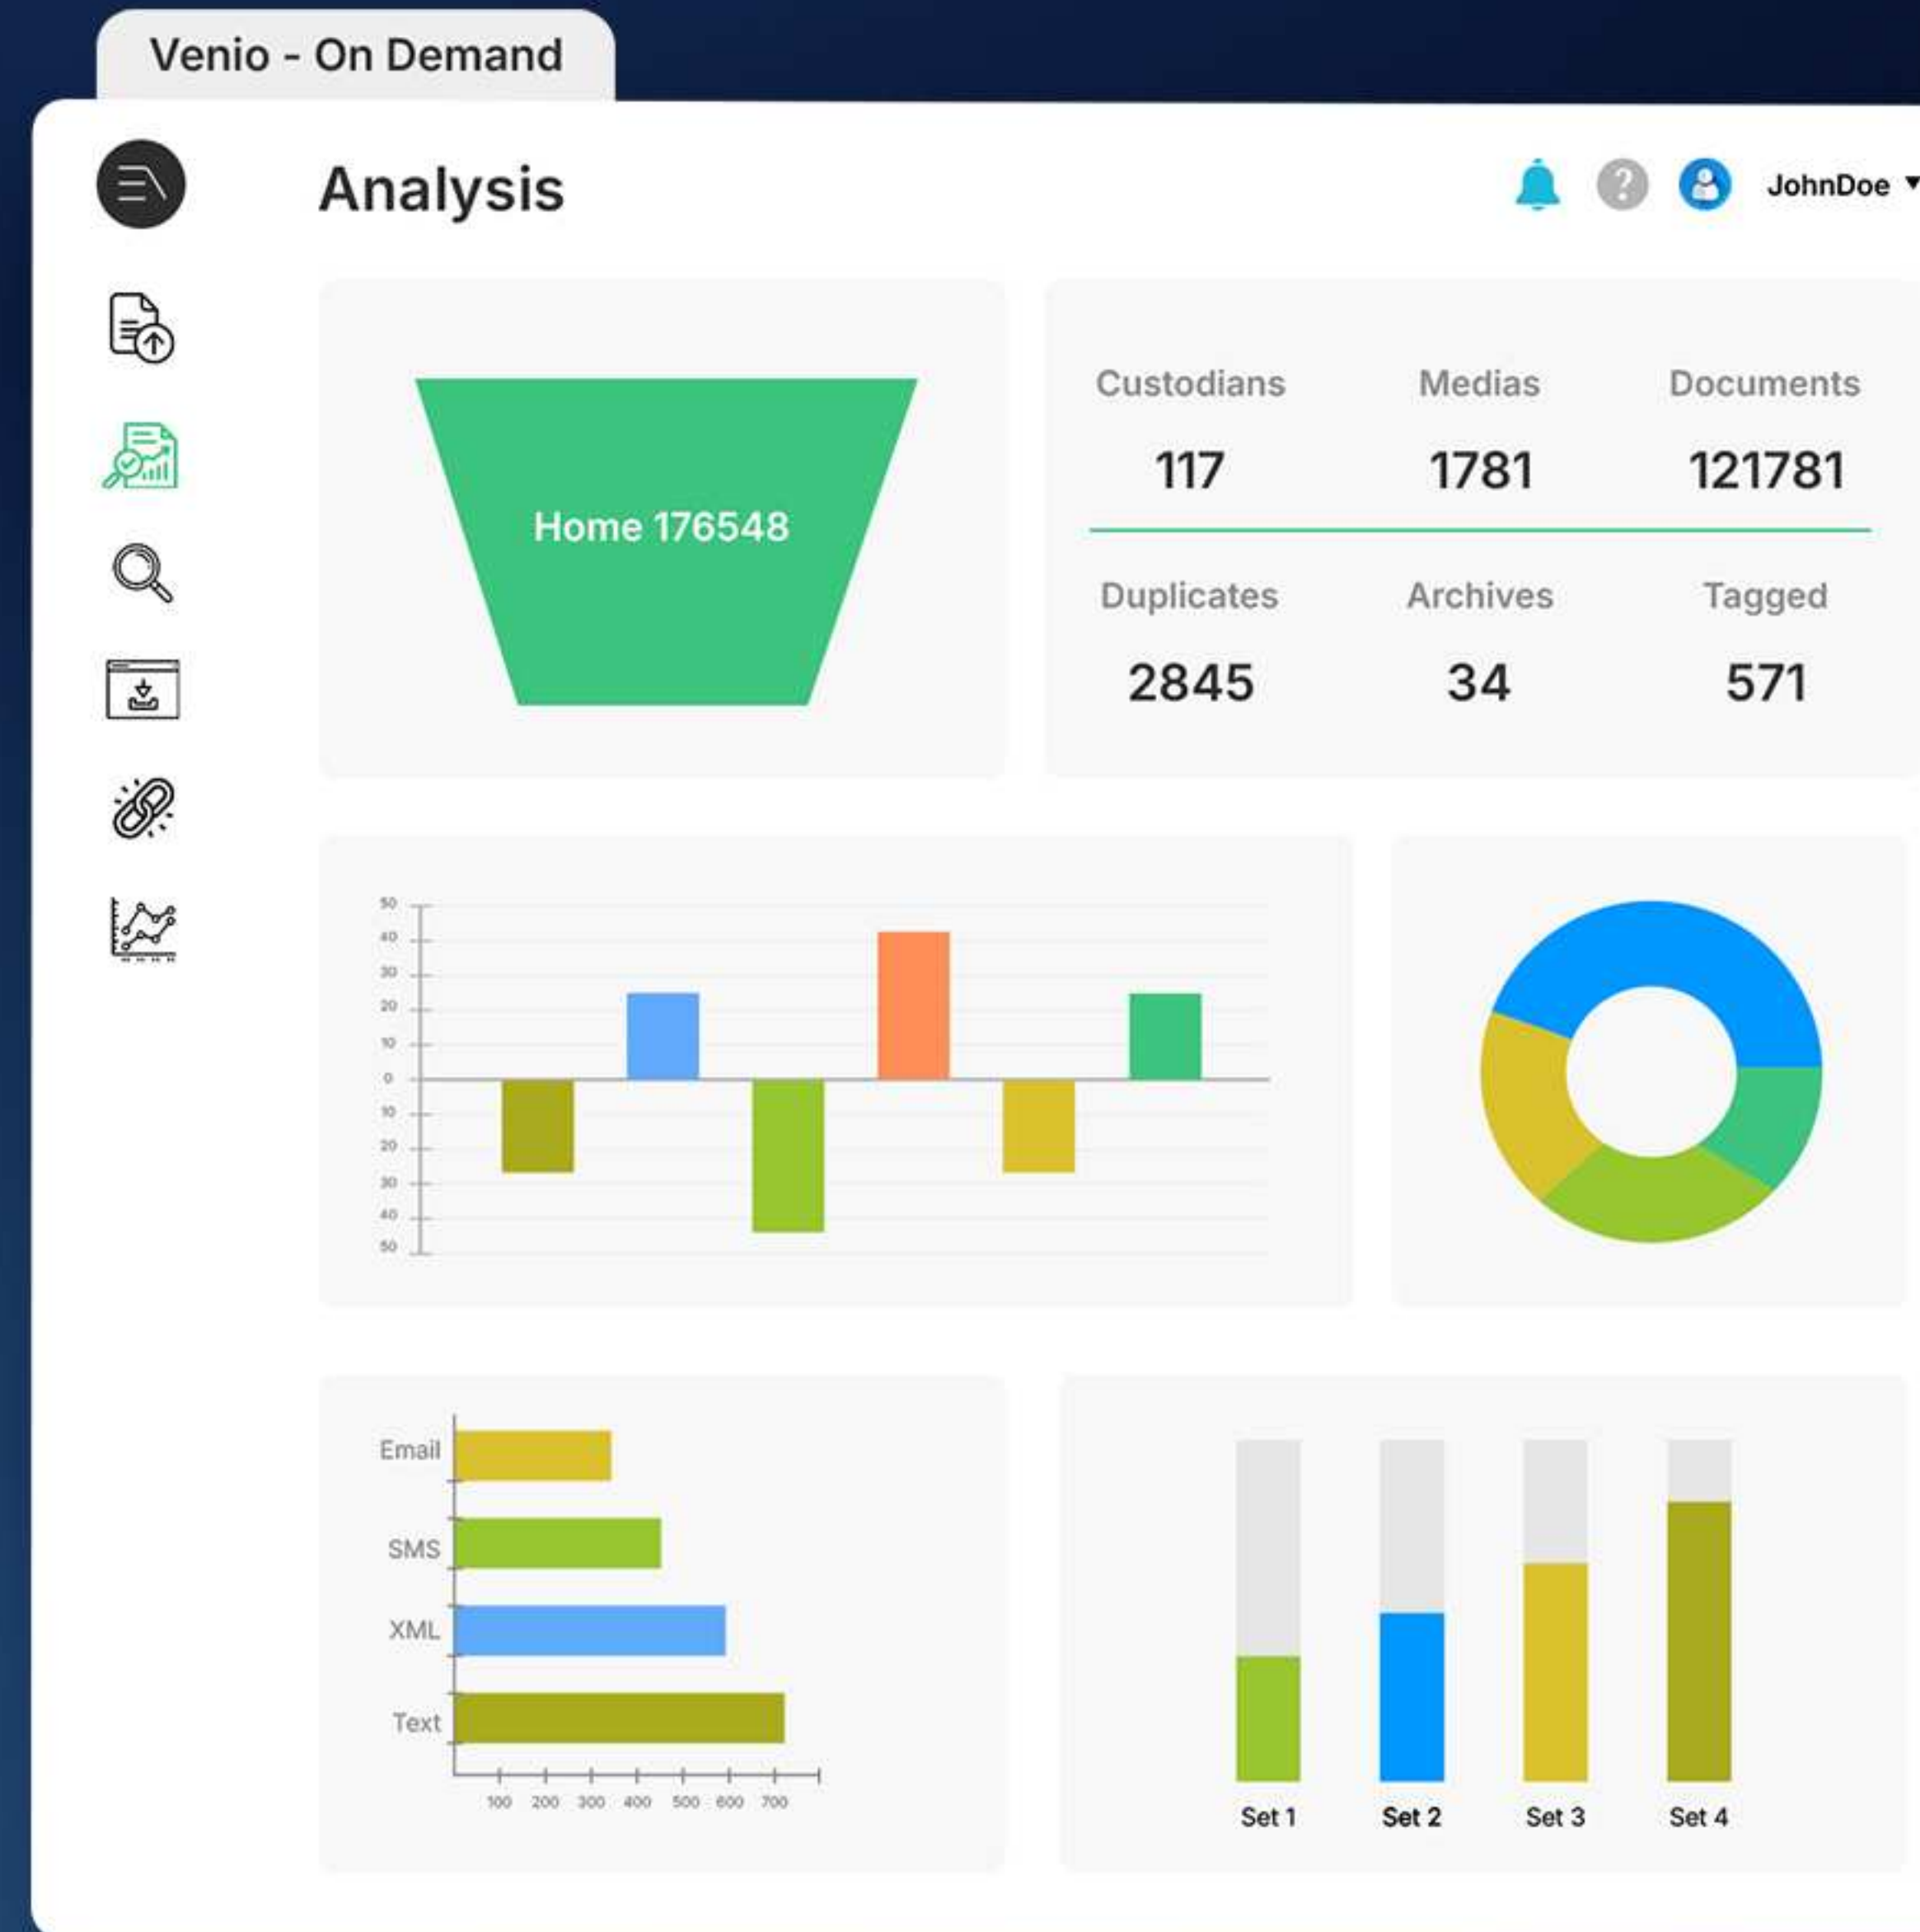

# Venio: Meeting the Demands of Modern Litigation

Venio Systems simplifies the entire EDRM lifecycle with a single, powerful platform.

# How Venio Helps Litigation Support Teams

## Unified Platform

Manage collection, processing, review, and production seamlessly.

## Faster Workflows

Automate routine tasks and reduce manual errors.

## Full Transparency

Gain real-time visibility into case progress and metrics.

## Built-In Security

Ensure compliance with strict data protection standards.

## Collaboration Made Easy

Enable attorneys, paralegals, and IT to work together without friction.

# Results You Can Expect

## Accelerated Case Timelines

*Move from collection to production faster with streamlined workflows*

## Lower Discovery Costs

*Cut down on manual work, vendor expenses, and inefficiencies*

## Confidence in Every Production

*Deliver defensible, high-quality results with accuracy and consistency*

## More Predictable Outcomes

*Gain confidence in project delivery with real-time visibility and reporting*

# Why Attorneys Trust Venio

End-to-end case lifecycle in one place

Simplified management with real-time reporting

Proven to deliver consistency at scale
